PROFILE My BSc and my two MSc 's have helped me to acquire a wide range of knowledge in different fields of C. S. Since graduation, I have worked for 2 years in Capita where I had the opportunity to gain experience in the .NET framework and Angular 2+. Currently, I am working for Clarksons on a .NET project.

SKILLS **Work:** C# Typescript T-SQL Angular2+ Skeleton HTML CSS Git
Universities: Java JavaScript AndroidSDK MySQL NoSQL Bootstrap

PROJECTS **Clarksons** Junior Software Developer Sep 17 – Present
Digitalize paper documents, make them editable online and print them as PDF using C# and MS-SQL

Capita FHE Graduate Software Developer Sep 15 – Sep 17
Wrote a windows app which included **SQL** scripts to convert the colleges' database in order to accept Unicode characters. In addition I changed the **C#** codebase to comply with the database's types conversion

I organised and lead a usability group at a college to measure the success of our app and receive feedback. I created the structure of the day, ran the group and analysed the outcome

Worked on a greenfield project for implementing the application layer of an already existing web app because it was using an outdated framework. I selected the **CSS** framework and implemented some components of the SPA using **Angular 2+**

RGU dissertation June 15 - Aug 15
Implemented a website using **Bootstrap**, **JavaScript** and **NoSql** where the user was able to join/create a football event it was also a platform connecting owners of 5 a side fields with their clients

Nottingham University dissertation June 14 - Aug 14
Developed an **Android** app which used **Bluetooth**, **GPS** and web services to store locations of nearby Bluetooth devices on the cloud, by creating ad hoc networks
