PROFILE

My BSc and my two MSc help me to acquire a wide range of knowledge in different fields of C. S. Since graduation, I worked for 2 years in capita where I had the opportunity to gain experience in the .Net framework and Angular 2+. Currently, I am working for Clarksons on a .Net project.

SKILLS

Work: C# Typescript Angular2+ T-Sql Html Css Git

Universities: Java Javascript Androidsdk Mysql Nosql Bootstrap

PROJECTS

Clarksons Junior Software Developer

Sep 17 –

Digitalize paper documents, make them editable online and print them as PDF using C# and MS-SQL

Capita FHE Graduate software developer

Sep 15 – Sep 17

Wrote a windows app that included SQL scripts to convert the colleges' database in order to accept Unicode characters. Also I changed our C# codebase to comply with the database's types conversion

I conducted a usability group at a college to measure the success of our app and receive feedback. I created the structure of the day, ran the group and analysed the outcome

Worked on a greenfield project for implementing the application layer of an already existing web app because it was using an outdated framework. I chose the CSS framework and implemented some components of the SPA using Angular 2+

RGU dissertation

June 15 - Aug 15

Implemented a website using Bootstrap, JavaScript and NoSql where the user was able to join/create a football event and also it was a platform connecting owners of 5 a side fields with their clients

Nottingham University dissertation

June 14 - Aug 14

Developed an Android app which used Bluetooth, GPS and web services to store locations, on the cloud, of nearby Bluetooth devices creating ad hoc networks
